

A²

22. (Amended) A method as set forth in claim 20 wherein
the prices from the legacy distribution system and the non-legacy distribution
sources for the event pass through an internet router after passing through the Internet and before
passing to the display screen.

23. (Amended) A method as set forth in claim 20 wherein
the prices from the legacy distribution system and the non-legacy distribution
sources for the event pass through an internet router after passing through the Internet and before
passing to the display screen.

A³

28. (Amended) A method as set forth in claim 18 wherein
an accounting application at the processing station provides an accounting of the
ticket printed at the processing station and selected from the legacy distribution system and the
non-legacy distribution sources for the event.

A⁴

31. (Amended) A method as set forth in claim 29 wherein
the request from the processing station specifies the event and the day of the event
and wherein

A⁴ 5 *omit*
the specifics from the legacy servers and the non-legacy servers identify the event and specify the time of the event during the specified date and specify the price for the event and wherein

the display shows the specifics set forth by the legacy servers and the non-legacy servers to the display.

A⁵
40. (Amended) A method as set forth in claim 39 wherein
the event is a trip on a specified day and the specifics provided for the event by the sources include a time of departure by a carrier during the specified day and a time of arrival of the carrier at a destination and a flight number and a price.

41. (Amended) In a method of providing at a processing station an indication of a minimal price for an event, the steps of:

5 providing through the internet from the processing station to non-legacy servers a request for information concerning the event where a date and specifics of the event are specified,

providing through the internet from non-legacy servers information fulfilling the request and specifying the times on the particular date for the event and specifying a price for the

event and specifying an identification of an event by the non-legacy servers to the processing station, and

providing a display at the processing station of the information provided through the Internet from the non-legacy servers to the processing station.

42. (Amended) A method as set forth in claim 41 wherein

the event is an airplane trip and wherein

the specifics requested by the processing station concerning the event include the date of the trip and an originating position and a destination and wherein

the information provided by the non-legacy sources includes an airline providing the transportation, the date of the event, the originating position, the destination, a time of departure from the originating position, a time of arrival at the destination and a price for the event.
